

**Paraben's E-mail Examiner 6.8
Release Notes**

Welcome to Paraben's E-mail Examiner 6.8!

E-mail Examiner is designed to forensically examine the most popular e-mail formats such as America Online (AOL), Outlook Exchange (PST & OST), Eudora, and many others. Paraben's E-mail Examiner is one of the most comprehensive **forensically sound** e-mail examination tools available. The technology in E-mail Examiner is unsurpassed at quickly recovering deleted messages and folders. However, E-mail Examiner doesn't just recover e-mail in the deleted folders; it recovers e-mail deleted from deleted items (deleted/deleted).

There are many great features in E-mail Examiner such as comprehensive analysis engines, easy bookmarking and reporting, advanced Boolean searching, searching within attachments, full Unicode language support, and a familiar and easy-to-use interface.

E-mail Examiner is just one of many hard drive forensic tools from Paraben Corporation for full product listings please visit us on the web at www.paraben.com.

What's new in E-mail Examiner 6.8

- Improved working with Unicode encodings (UTF-8)
- Improved working with email databases
- Improved stability, performance, and usability
- Added support for Microsoft Office 2007/2010 with attachment preview
- Added support for Open Office document format with attachment preview
