

Paraben's Link2 version 2.1 Release Notes

Welcome to Paraben's Link2!

This program is specially designed to allow you analyze links between data stored on different mobile devices. Link2 is compatible with Paraben's Device Seizure and is designed to make link charts, timelines, and statistical data from different mobile device information.

What's New in Link2 ver 2.1

- Completely new Firebird case format support.
- GUI improvement for better usability.

Link2 Key Features

Paraben's Link2 version 2.1 has the following key features:

- Data link map creation for analyzing links between data in different cases.
- Data link map adjustment for convenient analyzing (scaling, topic moving, topic resizing, different colors for different types of numbers, etc.)
- Data link map saving to multiple formats (PNG, SVG, PDF file, Visio file (*.vdx), AutoCAD file (*.dxf)).
- Detailed timeline data analyzing.
- Full statistic information.
- HTML reporting

Paraben's Link2 is complimentary to any and all Paraben customers and can be downloaded from Paraben's website at: www.paraben.com.
