

Paraben's SIM Card Seizure 3.1 Release Notes

Welcome to Paraben's SIM Card Seizure!

SIM Card Seizure is the ideal tool to recover deleted sms/text messages and perform comprehensive analysis of SIM card data. SIM Card Seizure takes the SIM Card acquisition and analysis components from Paraben's Device Seizure and puts it into a specialized SIM Card forensic acquisition and analysis tool.

SIM Card Seizure includes a free one year subscription with purchase.

What's New in SIM Card Seizure 3.1

- CDMA SIM card acquisition
- Completely new Firebird case format
- New Card reader support (Hi-Speed Mini USB 2.0 GSM Cell Phone SIM Card TF/Micro SD Reader Writer)
