Paraben Corporation partners with Automation Technologies Inc. a fusion of service and technology.

Pleasant Grove, UT January 28, 2008- Paraben Corporation announced that it has partnered with Automation Technologies Inc. as a service partner for deployments of Paraben's enterprise level forensic tools. This partnership enables both companies to provide comprehensive solutions to their clients on an enterprise wide basis.

"ATI has a solid reputation for service," said Amber Schroader, CEO of Paraben Corporation. "I feel this partnership measures up to the high level of Paraben's P2 Enterprise products." Paraben's enterprise forensic tools introduced the concept of proactive digital forensics for corporate and government networks by combining active network monitoring with network forensics. This proactive approach allows organizations to constantly watch their networks and immediately acquire forensic grade data before the offender can cover their tracks.

"Paraben is a world leader in the development of hardware and software forensics tools for both commercial and federal markets. ATI is excited about the future technologies that Paraben Corporation will offer and understands the dynamic changes within this industry," said Paul Fauser, Senior Vice President of ATI. The Paraben P2 Enterprise product is the most robust and comprehensive tool for digital forensics that we have identified. The combined strength and synergy these two company's offer, provides an exciting team that we are thrilled and honored to be associated with.

This unique fusion of service and technology makes for optimal solutions for customers in the government as well as corporate spaces.

Paraben Corporation

Founded in 1999 and with over 15 years of computer forensics experience, Paraben Corporation is a leader in specialized computer forensic software. Its growth is attributed to being the leader in handheld forensics and offering support for more handheld devices than any other company. Success has continued with the latest evolution in Paraben innovation in the enterprise forensic space. Paraben has its corporate headquarters in Pleasant Grove, Utah with satellite offices in Sterling, Virginia, and San Diego, California.

Automation Technologies, Inc. (ATI)

ATI (www.ati4it.com) is an SBA 8(a) certified, woman, minority owned small business provider of information technology consulting, managed services, and software development. ATI provides professional information technology and management consulting services to government and commercial clients.
