

Press Release

Paraben Corporation approved as an EC-Council Authorized Training Center

Albuquerque, NM October 31, 2007- Leading security certification organisation EC-Council announces tie-up with Paraben Corporation, one of the world's top digital forensics technology company, as the former's accredited training partner (ATP). This will definitely create mile stones for a better future in the IT education market. Paraben can now work hand in hand with EC-Council, the world leader in technical hands-on Information Security Education, in setting new standards and methods in building awareness of IT Security and digital forensics and how they work together.

Founded in 1999 and with over 15 years of computer forensics experience, Paraben Corporation is a leader in specialized computer forensic software. Its growth is attributed to the release of PDA Seizure in 2002, followed by the release of Cell Seizure, the first commercial tool for performing cell phone forensics. They have successfully evolved their latest focus on enterprise forensics. Paraben has its corporate headquarters in Pleasant Grove, Utah with a satellite office in the Washington D.C area. Paraben offers training classes in locations across the United States, the United Kingdom, Europe and Australia.

“The information security environment is ever-changing. Therefore the partnership between EC Council and Paraben will bring change and innovation to the information security environment. EC Council recognizes Paraben’s leadership in having its consultants certified by EC-Council to provide better service to their clientele. We are excited to note that Paraben will also offer the courses to their customers regularly” commented Sanjay Bavisi, President of EC-Council.

Amber Schroader, CEO of Paraben Corporation says “We are thrilled with the opportunity to partner with EC-Council. This really shows how different areas we have always thought as separate are really coming together. Preparing our customers for this convergence is very exciting.”

EC-Council and Paraben make a great partnership by aiming to reach for a paradigm change as a team. Having a new breed of IT personal and forensic examiners emerge with a strong perspective in both spaces and prepared for what lies ahead.
