

Paraben announces its 2nd Annual
Paraben Forensic Innovations Conference to be held in Park City, UT Nov 8-11th

The second annual Paraben's Forensics Innovations Conference (PFIC) is taking place in Park City, Utah on November 8-11, 2009 celebrating innovation in the areas of digital forensics, eDiscovery, and network security. Last year's attendees were overwhelmed with the amount of information that was offered at the event. "PFIC was the most informative conference I attended all year and it was a great location too." Rich Cruz of Michigan State Police stated. He was one of the many attendees from the law enforcement industry that was inspired at the thrilling content and training labs he received while at PFIC 2008.

PFIC 2009 will continue the excellence of its inaugural year by bringing the top innovators in the fields as presenters such as Eoghan Casey considered one of the fathers of digital forensics with his many published works including Digital Evidence and Computer Crime first and second edition. Joining Mr. Casey are other industry greats such as Karen Schuler of Intelligent Discovery Solutions, Jim Jaeger of General Dynamic AIS, and Amber Schroader of Paraben Corporation. These are only a few of the amazing presenters at PFIC and many of these lectures will be followed by hands on practical labs.

PFIC represents the best value conference with three days of training, meals, and networking opportunities with industry greats at an amazing mountain resort. In these hard economic times, value is a top decision maker for most organization but when value and innovation come together, it is an obvious choice to attend PFIC 2009.

Enrollment for PFIC 2009 is available at www.pfic2009.com.

About Paraben Corporation

Paraben Corporation was founded in 1999. Paraben quickly established itself as a leader in specialized computer forensic software with its release of PDA Seizure in early 2002. Paraben has continued to develop new and effective technology to help investigators with the extraction of digital evidence from hard drives, e-mail and, mobile devices covering the 360 degrees of digital forensics. Paraben has its corporate headquarters in Pleasant Grove, Utah with a satellite office in the Washington D.C. area. Paraben is the proud sponsor of PFIC that focuses on new and upcoming innovations in the fields of digital forensics, network security, and eDiscovery.
