

Spark and Paraben Partner to Light Up Forensics

San Jose, Calif. and Orem, Utah – December 19, 2006 – Spark Technology Corporation today announced that it has partnered with Paraben Corporation to deliver the next generation solution for the world of cell phone forensics. The two companies will work together to introduce a revolutionary new product that provides an easy, portable solution for mobile data acquisition designed specifically for the military, law enforcement, forensic practitioners and private investigators. This partnership leverages both Spark's platform to access mobile phone data and Paraben's high level expertise, reputation and relationships in the field of forensics.

"This is a great opportunity for us to be able to take our product platform into a completely new market that has been looking for a solution. The market potential in military and law enforcement is substantial and growing as mobile phone use and their functions increase. We are very excited to work with Paraben," said Randy Lee, General Manager at Spark Technology Corporation.

Paraben Corporation is the global leader in cell phone forensics and has been innovating this field since 2002. The addition of this new technology in the new CSI Stick will allow for more investigators in the field to gain access to valuable data.

"When we looked at all the great and amazing technology out there we knew that working with Spark was the only way to go. The CSI Stick (Cell Seizure Investigator Stick) is the perfect merging of technologies to allow for everyone to have access to the valuable evidence available on cellular devices." stated Amber Schroeder, CEO of Paraben Corporation.

The product launch is scheduled for 2007 with additional details to follow.

About Spark Technology

Spark Technology Corporation, headquartered in the heart of Silicon Valley, focuses on bringing innovation and ease of use to solve everyday problems for everyday people. Today, mobile phones are everywhere and they do just about everything. Mobile phones are used to store important personal information such as contacts, photos and music. The problem we all face is bridging the divide between our mobile phone and the rest of our world.

With our growing patent portfolio and leveraging our software and hardware expertise in the mobile and web spaces, Spark designs and develops products and solutions for consumers and carriers. For more information, please visit www.sparktech.com.

About Paraben Corporation

Paraben Corporation was established in 1999. Paraben quickly became a leader in handheld forensics with the release of PDA Seizure. After releasing Cell Seizure, the first commercially available tool for cell phone forensics, Paraben

combined the two tools to create Device Seizure, a comprehensive handheld forensic solution. Paraben also has many digital forensic software titles for forensic analysis of hard drives & media as well as specialized tools for enterprise level forensics, training classes, as well as forensic hardware.
